

An Open Letter to Congress on the Budget for Healthcare Reform

We, the undersigned physicians, strongly urge you to support President Obama's proposed budget for a healthcare reform reserve fund.

President Obama has presented a bold blueprint for health reform. It focuses on our most critical priorities:

- increased access to care that preserves patient choice
- reduced healthcare costs that would protect Americans from catastrophic medical bills
- improved quality care through better healthcare systems, information technology, and research.

President Obama's vision combines the best features of our current system with the reforms we need. These proposals and the values they represent are shared by millions of Americans. They are not Democratic or Republican values – they are American values.

As physicians, we are at the frontlines of an increasingly fragmented and dysfunctional health care system. We need the tools and freedom to practice medicine as we were trained to do. Our patients need meaningful reform. So do we.

The President has proposed an ambitious budget that makes a crucial down payment for health reform. We strongly urge Congress to keep the health reform reserve fund as proposed in the President's budget.

After many decades of false starts, we must make health reform a reality in 2009.

About Doctors for America: We are a grassroots physician organization that works to convey the ideas and experiences of physicians to achieve healthcare reform based on four key pillars – affordable coverage, expanded access to care, high quality care, and practice environments that allow physicians to focus on patient care. For more information: Visit our website (<http://www.dr sforamerica.org>) or email us (info@drsforamerica.org).

This campaign was run in partnership with the National Physicians Alliance (NPA, <http://npalliance.org>) and the Committee of Interns and Residents (CIR) / SEIU (<http://www.cirseiu.org>).
