

"As a doctor or medical student, I support the decision by HHS Secretary Kathleen Sebelius to ensure that women have access to cost-free contraception regardless of who their employers are (with exceptions for houses of worship). The religious beliefs of an employer should not be a barrier to women receiving the care they need." (February 8, 2012)

Institutions and affiliations are for identification purposes only. We all signed this petition as individual physicians and medical students. Our views are our own.
